

6.2 Proposed target measures

Proposed KPI	As-Is Baseline	To-Be Target (Desired Performance)	Rationale for Target
First-submission completeness rate	Low (30–50%).Frequent incomplete/incorrect documentation, conflicting details, and missing attachments	At least 90%	Mandatory fields and guided submission should reduce incomplete applications.
Onboarding cycle time	Highly variable, often 7–30+ days (24hours is the turnaround time under normal circumstances)	Within 5 business days	Workflow routing and reduced email handoffs should shorten turnaround.
SOP compliance rate by department	Not measured with heavy reliance on individuals and escalations	At least 95%	Clear SOPs and ServiceNow-based tracking should improve adherence.
Portal adoption rate	0% as All submissions currently via email and manual forms	At least 85% within 6 months of go-live	The portal must become the primary submission channel for the redesign to work.
Rework rate	High (40–60%) as repeated follow-ups are the norm due to incomplete submissions	No more than 10%	Validation at the point of submission should reduce corrective follow-up.
Status visibility rate	Low (10%) as progress is currently tracked through direct email queries.	At least 90%	Real-time tracking should provide customers and internal teams with visibility over progress
